PROFESSIONAL SUMMARY

Adaptable and detail-oriented Software Engineer and MCA graduate with strong foundational knowledge in object-oriented programming, relational databases, RESTful web services, and cloud integration. Experienced in developing backend modules, designing secure APIs, containerizing applications with Docker, and collaborating across full-stack environments. A fast learner with solid problem-solving abilities and a strong commitment to building clean, maintainable software across diverse engineering roles.

TECHNICAL SKILLS

Languages:	Java, SQL, JavaScript (ES6+), HTML5, CSS3
Frameworks & Web:	Spring Boot, Spring MVC, REST APIs, React (Basics), Tailwind CSS, Spring AI, JSP, Servlets
Databases & Cloud:	PostgreSQL, MySQL, Redis, AWS S3, Flyway Database Migrations
Tools & Practices:	Git, GitHub, Docker, Postman, Maven, Swagger/OpenAPI, Linux CLI, Agile

WORK EXPERIENCE

Junior Software Engineer Trainee — Keross R&D Center Pvt. Ltd. *Jun 2026 – Present*

- Engineered core application modules using Spring Boot, PostgreSQL, and AWS S3, implementing phone OTP authentication with JWT tokens, configurable expiration limits, and Flyway migrations.
- Developed prescription-processing workflows utilizing Spring AI ChatClient to extract and structure information from uploaded medical documents.
- Implemented secure REST APIs for dosage management, health metrics, and utility bill tracking using DTO patterns and scheduled background jobs for automated notifications.

Software Developer Intern — MR2K Solutions LLP *Mar 2026 – Jun 2026*

BWDP Construction Platform — Production App (1K+ Play Store Downloads)

- Developed backend REST APIs for the BWDP Construction platform (1K+ Play Store downloads), powering contractor, seller, and admin modules for project workflows and quotation management.
- Implemented multi-tier inventory verification pipelines using PostgreSQL and MyBatis, ensuring verified catalog items across mobile and web clients.
- Containerized backend services using Docker for uniform deployment environments and documented all endpoints using Swagger/OpenAPI.

PROJECTS

DevToolBox — Developer Utilities Web Platform *GitHub*

Spring Boot, REST APIs, Maven, Postman

- Built a collection of web utility services (URL shortener, QR code generator, UUID generator) with centralized error handling, request validation, and clean RESTful design.
- Configured automated Postman test suites to validate edge cases and guarantee response integrity across all endpoints.

Library Management System — Full-Stack Web Application *GitHub*

Java, JSP, Servlets, JDBC, MySQL, JavaMail API, iText

- Architected an MVC-based web application with role-based access control (RBAC), fine calculation, and catalog management for students and administrators.
- Integrated JavaMail API for OTP password resets and automated PDF invoice/receipt generation using iText.

EDUCATION

Master of Computer Applications (MCA) — Heritage Institute of Technology *2024 – 2026 | CGPA: 8.32*

Bachelor of Science in Physics — University of Calcutta *2020 – 2023 | CGPA: 7.89*

CERTIFICATIONS

Aptech Smart Pro Web Application Development *Aug 2025*
